In January, the A.B. Won Pat International Airport Authority, Guam (GIAA) celebrated Airport Week 2011, commemorating its 35th anniversary as an autonomous GovGuam agency and over 75 years of commercial aviation services on our island. The airport has grown exponentially from a simple Quonset hut servicing 1940’s travelers to a world-class 767,553 sq. ft. facility processing up to 2.9 million passengers, as recorded last year. Currently, Guam ranks 6th nationwide, for international arrivals with 93% of Guam’s arriving passengers international in origin.

The Authority’s vision is to advance Guam further as the first-class premier air transportation hub of the region.

The Authority strives to ensure the safety and security of the traveling public, is dedicated to maintaining a superior and reliable level of airport services for our island residents and tourists, and is committed to supporting the development of air linkages and facilities which are integral parts of the island’s future economic growth.

To deliver improvements in customer service, facilities and access infrastructure, economic development, competitive positioning, community relations and governance and organization.

In the immediate future, newly expanded runways will accommodate non-stop, long haul transpacific flight to the continental U.S., strengthening Guam’s advantage as an international hub. From a simple hut and sea-planes to an international hub with jet planes, our airport’s building milestones include: the $1.6M first Guam International Air Terminal built in 1967; followed by the $43M edifice, which opened January of 1982; and finally our present monolithic airport of 1998, funded with $242M bond financing, the single largest capital improvement project undertaken on Guam.

Two new developers have completed construction on warehouse/cargo facilities with office space, and are now in full operation at Airport’s Tiyan Business Park and the Airport Industrial Park. Consolidated Transportation Services, Inc. (CTSI) Logistics provides services in airfreight, logistics, transport, ocean freight, and warehouse management in 27 stations throughout 12 countries in Asia, Asia-Pacific and North America. Their $4.5M Airport Freight Facility measures 35,000 sq. ft. and houses offices for their logistics and airfreight operations. Marianas Steamship Agency (MSA) Logistics has also completed its $1.5M construction and now occupies a 20,000 sq. ft. facility in the Airport Business Park next to the overpass/underpass. This facility, with its million-dollar vista of Tumon Bay, features office space; temperature controlled warehousing space; and is welcome support in the increased capacity of air cargo volume associated with the military buildup.
Mixin’ It Up – New Passenger Options

The A.B. Won Pat International Airport Authority, Guam has added several retail, food and service concessions to engage passengers with quality, popular brands and exciting new tastes. The Airport is excited to house a number of local brands with local ownership, such as Ben & Yan’s, with delicious indigenous, regional offerings to passengers. International brands are equally vital to the mix.

Instant name recognition of high quality leisure goods such as Marc by Marc Jacobs makes the shopping experience that more exciting to our passengers, we want our passengers engaged and satisfied as part of their Airport experience.

Safe and Secure from Every Perspective

Law enforcement units ramped up efforts to keep travelers, employees and users of Airport Facilities safe and secure from every perspective. Within the terminal, on our roadways, throughout activity in and around cargo buildings, parking lots and at every point of the passenger processing experience - the latest in security and safety are employed by qualified and trained personnel. In the modern travel environment, security procedures at airports are very necessary, and at the A.B Won Pat International Airport Authority, Guam, we are on par with security measures on local, federal and international levels. We thank our law enforcement agencies consisting of the Airport Police, TSA, Guam Customs and Quarantine and the US Customs and Border Protection who exercise the latest techniques to thwart terrorism and keep our borders and island safe.
